

Physical Prototype:
Doomsday:
Underground Uprise

Team: Tri-Hard

- Matija Jajcinovic
- Haorui Tan
- Hongbo Chen

Gameplay

- build your bunker and surface buildings
- assign people to it, or build robots to operate on surface
- surface absolute essential to survive but attack regularly by enemies

=> employ Tower Defense and Defend Bots

Abstractions for Prototyping

- round based discretization (approx 1 min equals round)
 - no advanced fights but “plus minus” strength values
 - action cards for random events (like generators explodes)
-

Goal

- find some balance for resources and core game mechanic of building

Restrictions

- Cannot fully replicate physics-based fights
 - Tower defense not simulateable
 - trying to reduce travel time of workers by placing buildings right

Workers' status

Normal:

Hungry:

Hurted:

In one round

Robot Factory

turns **Normal** workers into **Hungry** workers

turns **Hungry** workers into **Hurt** workers

produce N robots when having N workers in the factory

Electricity Generator

turns **Normal** workers into **Hungry** workers

turns **Hungry** workers into **Hurt** workers

support **Robot Factory** and Defense Towers

Mensa

turns **Hungry** workers into **Normal** workers

Medical Bay

turns **Hurt** workers into **Hungry** workers

turns **Hungry** workers into **Normal** workers

-At the beginning of the game, there is only one base on the surface without any defense system.

-When enough resources are produced underground, players can choose to build defense towers, robots and weapons. They all have unique values (attack power, attack range, etc.).

-Robots can only fight with designated weapons. Players can control robots and designate them to go to specific places to fight.

-Players can also build crops on the surface to reduce hunger. There are also harvest robots to harvest crops(can't fight).

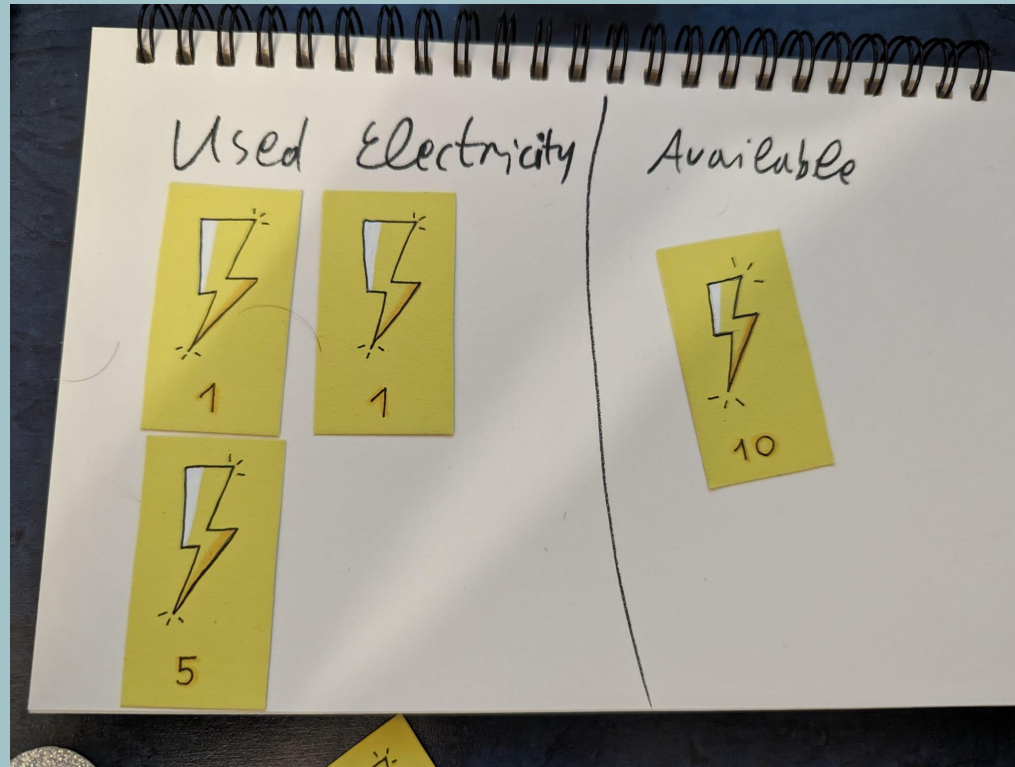

-Building any object will reduce different metal values, and towers and robots will reduce electric value per min.

-Monsters will appear from the lower left and upper right corners of the map. They will move towards the base and attack anything nearby. Monsters have different settings.

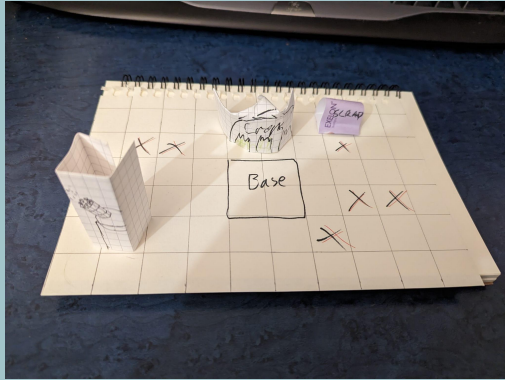

Resources

Assessment

- many new revealed questions
- map design boring => more complicated layout
- need for mathematical model to estimate resources
