

WRITING YOUR FINAL THESIS (BACHELOR'S / MASTER'S) AT THE TUM DEPARTMENT OF AEROSPACE AND GEODESY (ASG)

How to find a supervisor and a topic

It is in your own responsibility to find a supervisor and a topic for your final thesis.

There are two ways for finding a supervisor/topic:

- Contact one of our lecturers directly and ask them whether they will supervise your thesis; often our lecturers have a number of thesis topics for you to choose from.

Here you can find a list of all professorships in the Department of Aerospace and Geodesy:

<https://www.asg.ed.tum.de/en/asg/about-us/professorships/>

- The student council offers a list with thesis topics where you may choose one:

<https://www.fsmb.de/fsmb/service/basama-hiwi/>

Registration of your thesis

Important:

Registration of your thesis with the examination office ASG is **only** necessary if you wish to have your thesis marked by your TUM supervisor. In that case please ask your supervisor directly, they will register your thesis for you.

It is possible for you to just write your thesis at TUM and have it marked by one of your professors at your home university. In this case your thesis need not be registered at all at TUM.

Deadlines for your thesis

Depending on which subject you are writing your thesis in there are different deadlines for submission of the thesis:

Bachelor's Thesis:

Subject	Duration for writing the thesis
Aerospace	3 months
Geodesy	5 months

Please note: An oral presentation about the contents of the thesis is mandatory. The presentation is not being marked.

Master's Thesis:

Subjects	Duration for writing the thesis
Aerospace and Geodesy/Cartography/Land Management	6 months

Please note: An oral presentation about the contents of the thesis is mandatory. The presentation is not being marked.
