## Alzheimer's disease

# Machine Learning in Neuroimaging

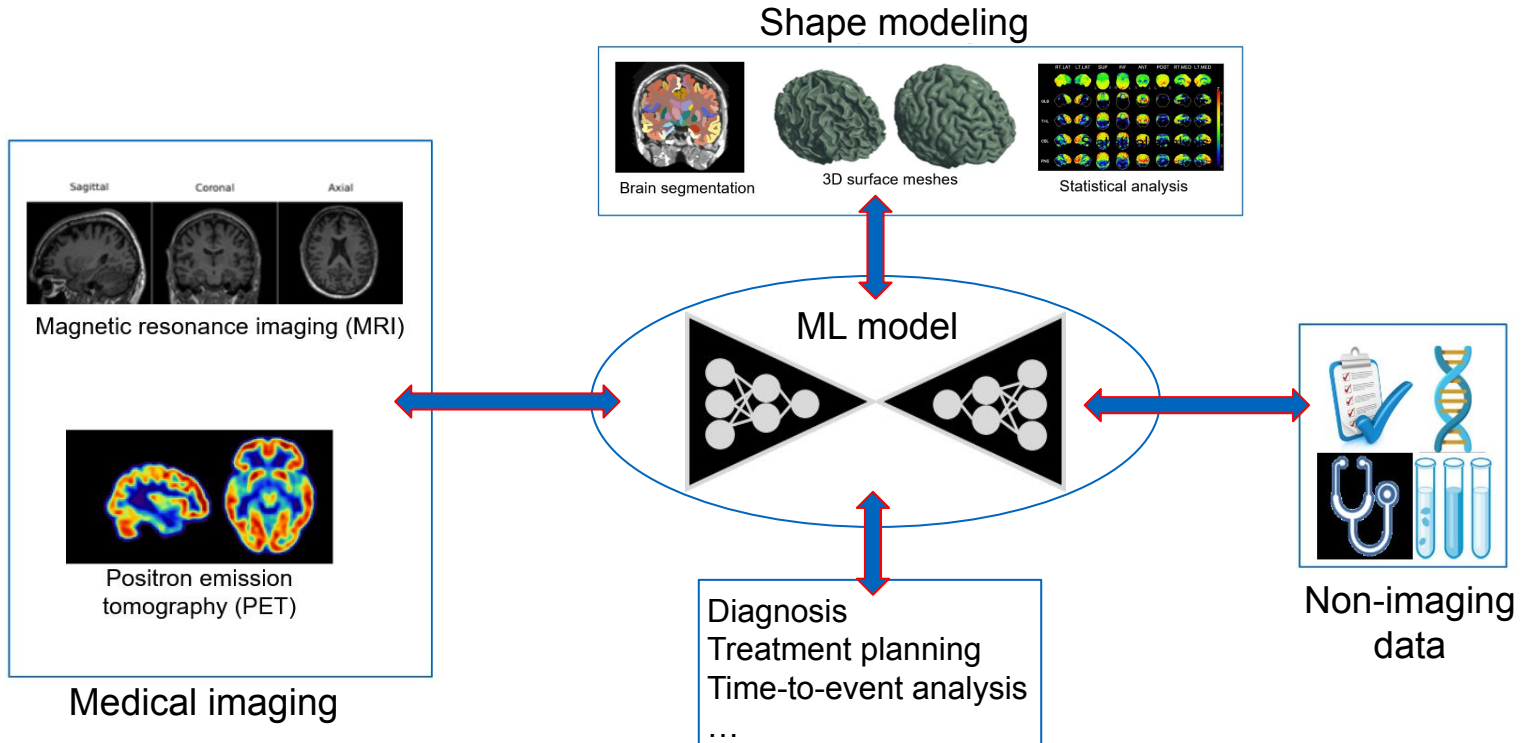

Medical Imaging

Non-imaging data

Diagnosis  
 Treatment planning  
 Time-to-event analysis  
 ...

# Machine Learning in Neuroimaging: Overview

# Exemplary Topics

- Deep learning architectures (CNN, GNN, Transformer)
- Optimization techniques
- Multi-modal data analysis
- Disease prediction (e.g. Alzheimer's)
- Supervised and unsupervised learning strategies (and in-between, e.g., semi-supervised)
- Statistical shape modeling
- Explainability of deep neural networks
- Causal inference

See also topics from [last semester](#)

# Learning outcomes

- How to read a paper in a structured way?
- How to phrase complex ideas in an understandable blog post?
- How to present research findings to an audience?

# What to deliver?

- Paper presentation (20 min. presentation, 10 min. discussion)  
**50% of final grade**
- Blog post (~4 pages DIN A4, working with ChatGPT encouraged) about the selected paper  
**50% of final grade**

# Preliminaries (recommended)

- Machine learning principles (e.g. IN2357 Machine Learning for Computer Vision, IN2064 Machine Learning)
- Fundamentals of deep learning (e.g. IN2346 Introduction to Deep Learning)
- Good understanding of computer vision (e.g. IN2228 Computer Vision II: Multiple View Geometry)

# Schedule

06.02.23: Pre-course meeting (today)

23.02.23: Matching results

April 4, 2023, 23:59: Deadline for deregistration

**April: Kickoff (online, attendance mandatory), assignment of papers.** Exact dates TBA.

During the semester: Meet your supervisor (not mandatory but recommended)

**June 13/14, 2023, 9-13: Block seminar (LUTZ /Nigerstr., close to Klinikum rechts der Isar)**

**Attendance is mandatory**
