# Machine Learning in Neuroimaging: Overview

# Exemplary Topics

- Deep learning architectures (CNN, GNN, Transformer)
- Optimization techniques
- Multi-modal data analysis
- Disease prediction (e.g. Alzheimer's)
- Supervised and unsupervised learning strategies (and in-between, e.g., semi-supervised)
- Statistical shape modeling
- Explainability of deep neural networks
- Causal inference

# Learning outcomes

- How to read a paper in a structured way?
- How to phrase complex ideas in an understandable blog post?
- How to present research findings to an audience?

# What to deliver?

- Paper presentation (20 min. presentation, 10 min. discussion) **50% of final grade**
- Blog post (~4 pages DIN A4) about the selected paper **50% of final grade**

# Preliminaries (recommended)

- Machine learning principles (e.g. IN2357 Machine Learning for Computer Vision, IN2064 Machine Learning)
- Fundamentals of deep learning (e.g. IN2346 Introduction to Deep Learning)
- Good understanding of computer vision (e.g. IN2228 Computer Vision II: Multiple View Geometry)

# Schedule

18.07.22: Pre-course meeting (today)

05.08.22: Matching results

05.08.22 - 19.08.22: Assignment of papers

**24.10.22, 13:00: Kickoff, Attendance is mandatory**

Before Christmas: Meet your supervisor (optional but recommended)

**9./10.01.23, 9-13: Block seminar (LUTZ /Nigerstr., Seminarraum 2)**

**Attendance is mandatory**
