Targets - Game Design

Desired

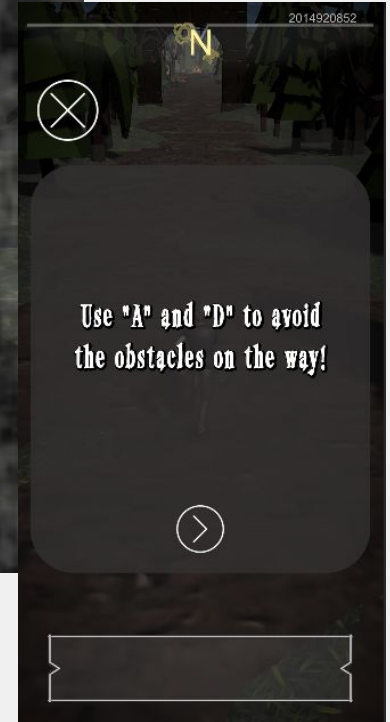

- Fast paced game, casual
- Multiple platforms
- Atmosphere
- Slenderman is constant threat
- Adjustable difficulty

Achieved

- Game: Player is rushing through labyrinth, with limited decision time for actions. Controls are fun and easy to learn.
- Support PC and mobile with different controls
- Suspense and threat, created by visual effects and sound. Visual effects give feedback and weight to the actions.
- Slenderman: Represent by distance to player, changing through punishment, distance shown by noise overlay and sound
- Difficulty: Obstacle density, player speed, labyrinth parameters

Targets - Game Design

Target - Technical Achievement

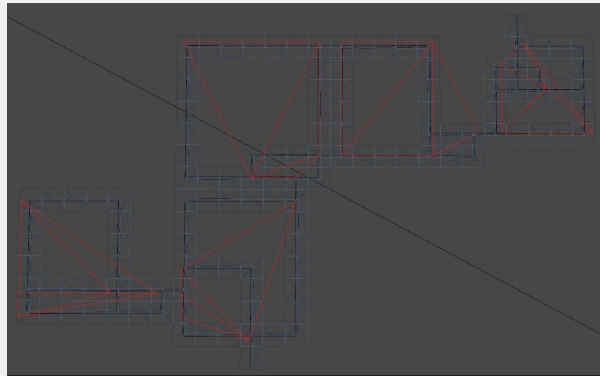

Desired

- Procedurally generated levels
- Tile occlusion

Achieved

- Multiple Sections
 - Generated using triangulation method
 - Sections are translated into instantiated tiles
 - Spawn items to cross section barricades
-
- Delaunay triangulation for occlusion -> just render visible tiles

Initial Prototype

Progression during development

- Similar to Prototype:
 - Compass:
 - Items for barricades:
 - Timed Swiping:
 - Tutorial:
 - Scrapped:
- Collect items, evade obstacles, perform quick time events
 - Minimap replaced by Compass: Shows nearby items and barricades
 - Items: Player has to pick them up to progress in section. No permanent boosts.
 - Sweet-Spot mechanic: Player can gain a boost
 - Replaced simple texts with dedicated tutorial level
 - Fighting mechanic
