

October 2023

Newsletter for Doctoral Candidates of GC-ED

The semester is in full swing and we send our greetings together with some short information!

2023 Doctoral Representatives' Elections – Thank you for your participation!

“We, **the newly elected representatives** of the School of Engineering and Design - Artur Toshev, Ayesha Müller-Wolfertshofer, Deniz Köse, Jessica Bielski, Marco Hölzel, Stuart Daniel James, Yunfei Zhan - would like to introduce ourselves and look forward to meeting you in the upcoming events. A list with the planned activities for our term October 2023 - September 2024 will be updated on the [website](#) in the upcoming weeks. Feel free to contact us if you have any suggestions or there are any problems you are facing in the meantime at promovierendenvertretung.gc@ed.tum.de.”

Get more out of your doctoral education!

If your doctoral research is related to robotics and machine intelligence, a new opportunity to **beef up your doctoral education** has just appeared!

The **Munich Institute of Robotics and Machine Intelligence** ([MIRMI](#)) brings together researchers across the TUM-schools and is the gateway to the international community. Mirmi proposes a **new Graduate Program** specially tailored to widen your knowledge and expertise. This program can be used to partially fulfil the requirements at the Graduate Center of your School. **Registration starts 16th of October 2023**. Want to know more? Check [Graduate Program website](#) and **attend the information get-together** (free drinks and pizza!) on **Friday 20th of October 2023, 4:30 pm**.

Come one, come all: Free writing and editing support for TUM graduate students

The research is one thing, writing it up another – and we're here to help.

Graduate students at the TUM have two main resources for free, personalized English writing assistance. The [TUM English Coaching program](#) is staffed by professional writing instructors focused on getting you published and funded – through their [interactive editing process](#) – and helping improve your conference presentations and teaching by reviewing your materials, visiting your lectures or discussion groups, and providing feedback.

The [TUM English Writing Center \(EWC\)](#) offers one-to-one appointments to students, grad students, and staff, who are welcome to bring along any document they are hoping to improve – from dissertations to job market papers to CVs and cover letters. And because many of the EWC's writing tutors are TUM students themselves, you can often connect with someone who already knows your field intimately.

We hope you'll make use of our services – offered in Munich, Garching, Weihenstephan and online, with easy online booking for each. Visit our websites for more information, and feel free to get in touch with questions.
