To all students of the
Bachelor of Architecture program

Examination registration I winter semester 2023/24

Dear students of the BA Architecture program,

You can register for the exams from November 20, 2023 to January 15, 2024.
(Please note that the registration period may be shorter in some cases).

New regulation TUM-wide:
Examination deregistrations are only possible up to 7 days before the examination date in TUMonline. Working days and weekdays are treated equally.

Please check the examination dates regularly in TUMonline, especially shortly before the exam to see if there are any changes.

Please register for the examination for all courses you are taking this semester (including projects/seminar papers etc.). Only if you are properly registered in TUMonline, the chair has access to your account and can enter your examination results.

It is best to register for the examinations via your study tree (Curriculum support), then there will be no confusion with exams of the same name and it is guaranteed that you are registered for the correct exam that is valid for you.

You can find help on TUMonline here: https://www.it.tum.de/it/tumonline/studieren/

An important point for our 1st and 3rd semester students:
You will be automatically registered by me for the compulsory module examinations in the first attempt of the 1st and 3rd semester.

This applies to all:
You must register yourself for repeat examinations / catch-up examinations for the compulsory modules (1st-4th semester) and for examinations in the area of elective modules (Wahlmodule); this also applies to the compulsory module examination Baurecht, Bauprozess und Baumanagement.
Bachelor’s thesis – W23

Students who wish to do their Bachelor’s thesis in the coming summer semester 2024, please contact me (sabine.selzle@tum.de) by e-mail within the above-mentioned examination registration period.

Greetings from the School Office
Sabine Selzle
