Roguelike Dungeon Crawler

- 2.5D Twinstick-shooter
- Procedural generated levels
- Futuristic setting (vaporwave like visuals)
- Play a hacker trying to save the cyberspace by destroying glitches

"Big Idea" Bulls Eye

Core Idea:
Rogue-like dungeon crawler

Technical Achievement:
Procedurally generated levels

Technical Achievement

- Procedurally generated levels
 - Generate rooms with enemies, traps and obstacles
 - Increasing difficulty as game progresses
 - Different level types

Functional Minimum

- Handmade level
- One functional enemy
- Basic Playable character
- Simple UI (Health, Quit Game, Settings)

す

low Target

- Simple procedural level generation
- Player abilities
- Visually somewhat appealing
- Boss enemy
- Level obstacles

Desirable Target

- Fancier procedural level generation
- Extended UI
- More and animated enemies (~3)
- Traps
- Sound effects and music
- Well balanced

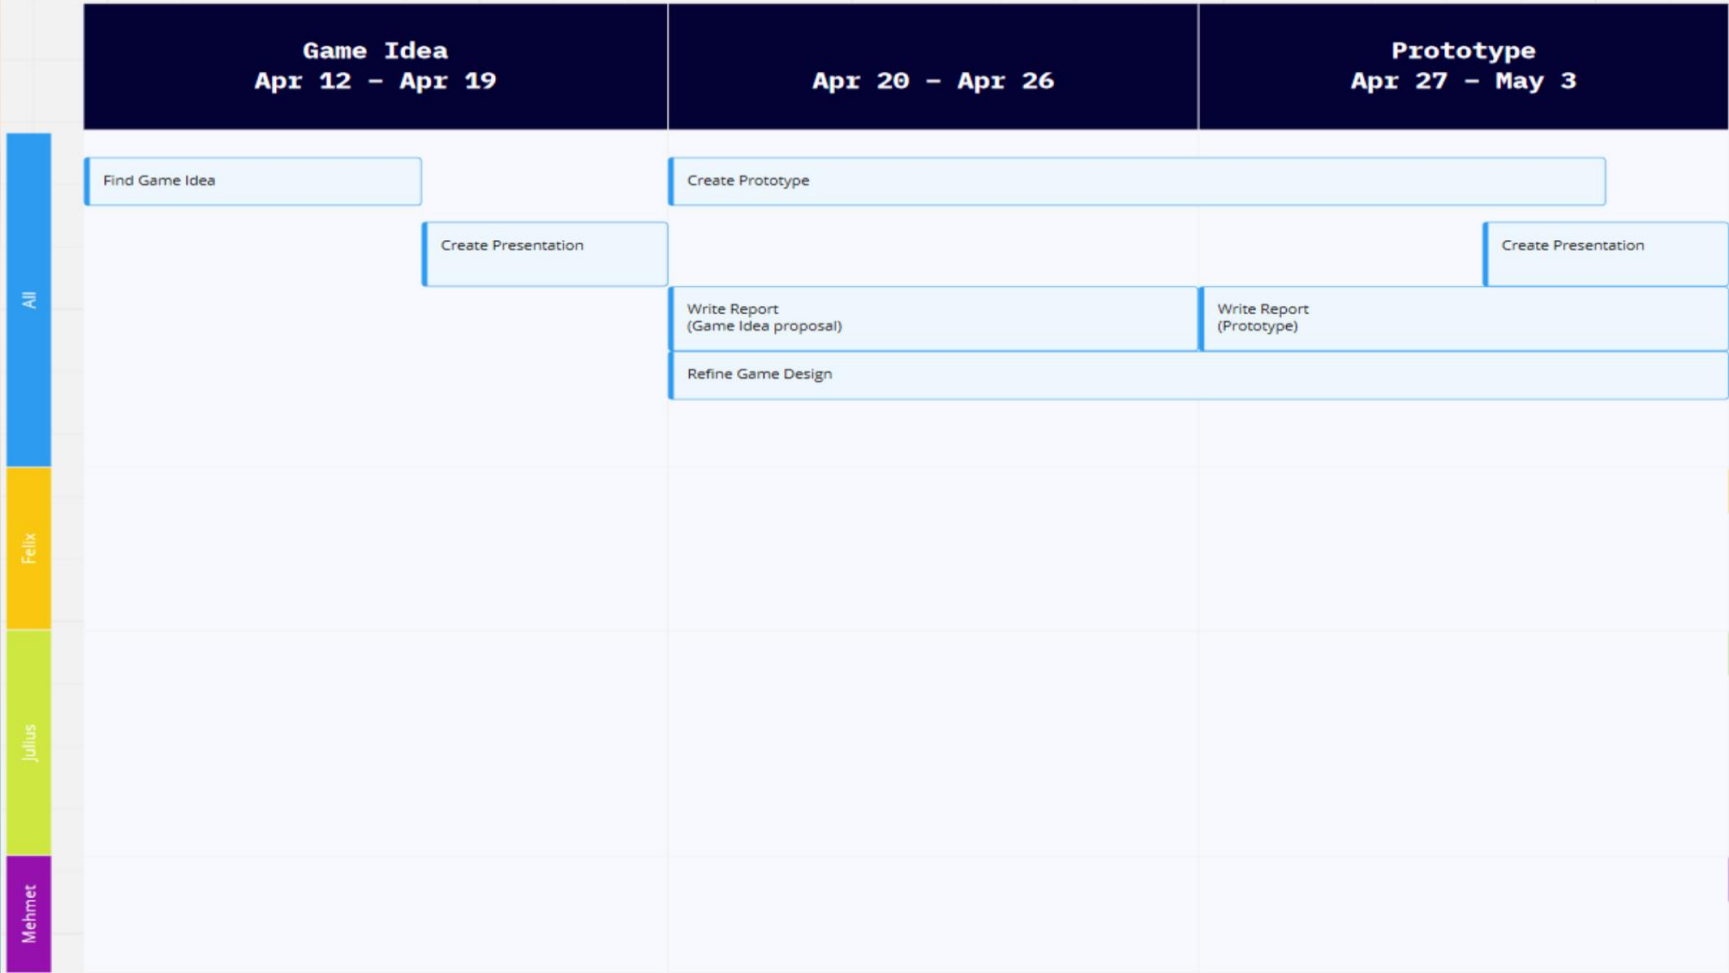

High Target

- Visual Feedback Effects (i.e. screen shake etc)
- More weapons
- Collectibles (Player Power-ups/Upgrades)
- Enemy drops
- Hub world
- Basic narrative
