Intel® oneAPI Tools for AI

Dr. Séverine Habert, Deep Learning Software Engineer

April 9th, 2021

oneAPI

One Programming Model for Multiple Architectures & Vendors

Freedom to Make Your Best Choice

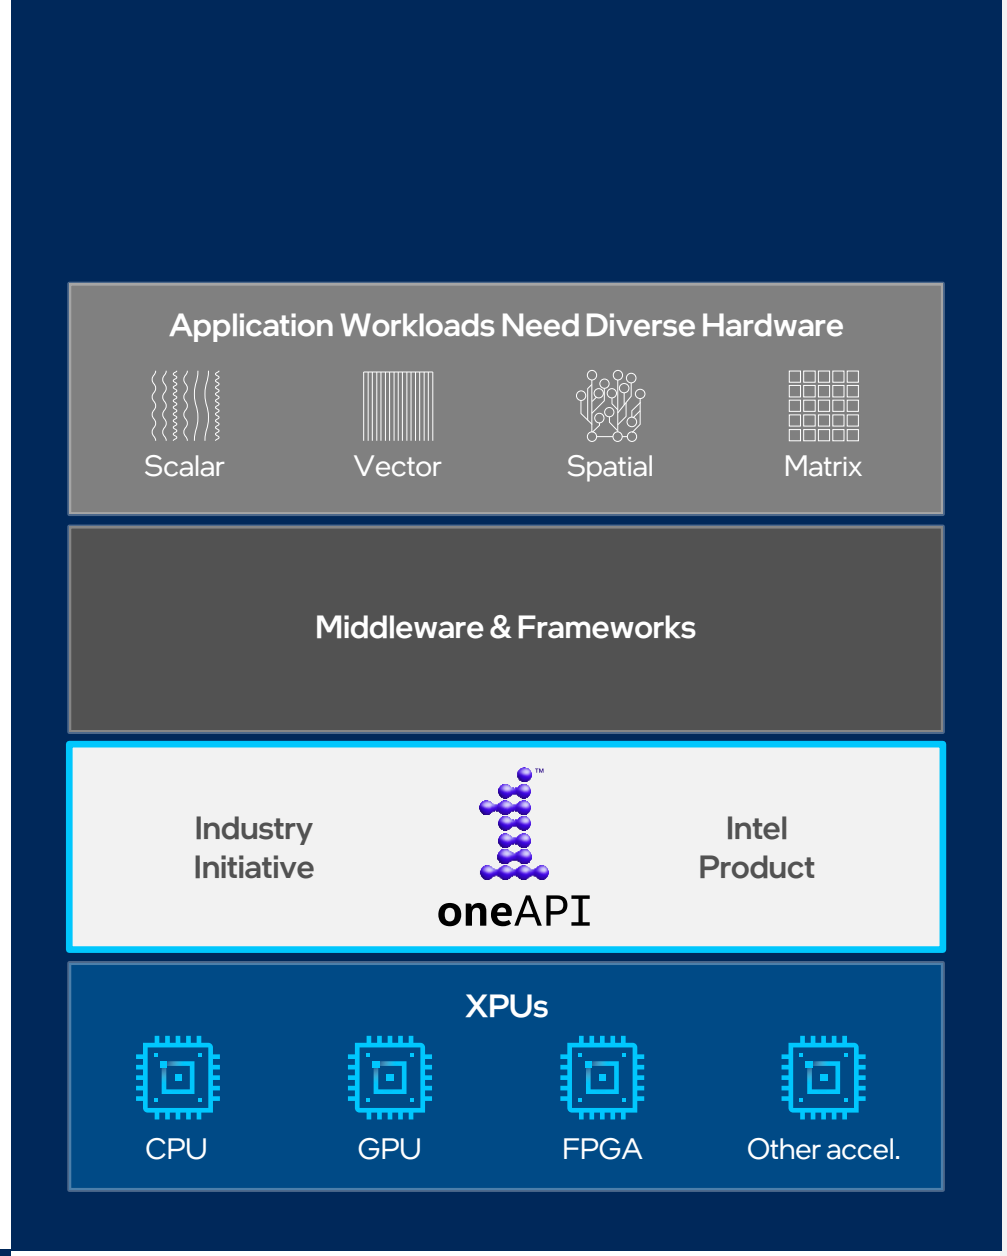
- Choose the best accelerated technology the software doesn't decide for you

Realize all the Hardware Value

- Performance across CPU, GPUs, FPGAs, and other accelerators

Develop & Deploy Software with Peace of Mind

- Open industry standards provide a safe, clear path to the future
- Compatible with existing languages and programming models including C++, Python, SYCL, OpenMP, Fortran, and MPI



Intel's oneAPI Ecosystem

Built on Intel's Rich Heritage of CPU Tools Expanded to XPUs

oneAPI

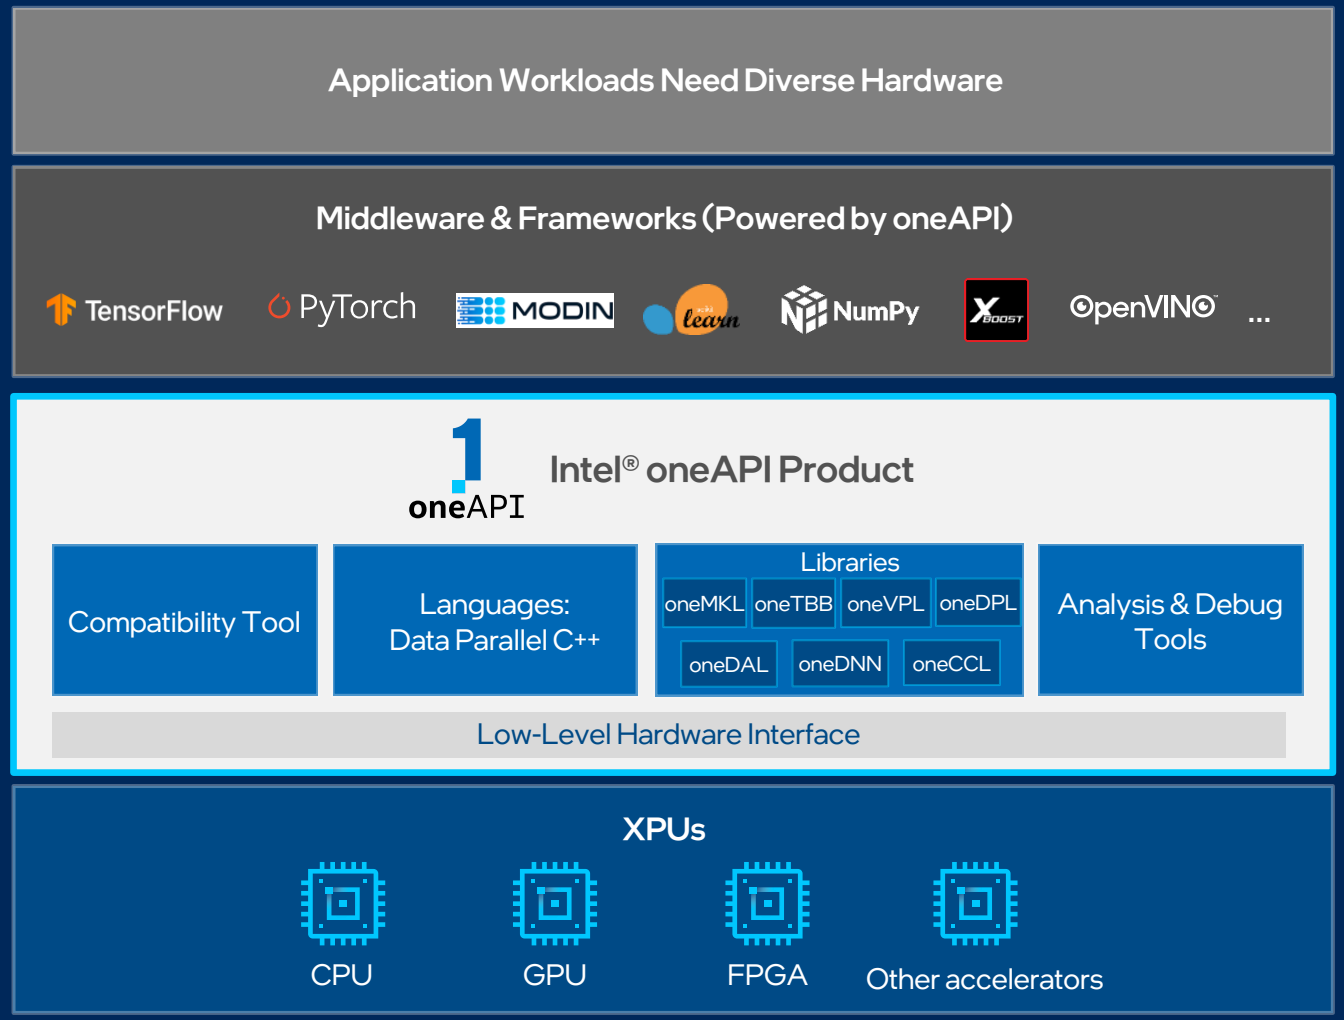
A cross-architecture language based on C++ and SYCL standards

Powerful libraries designed for acceleration of domain-specific functions

A complete set of advanced compilers, libraries, and porting, analysis and debugger tools

Powered by oneAPI

Frameworks and middleware that are built using one or more of the oneAPI industry specification elements, the DPC++ language, and libraries listed on oneapi.com.



Available Now

Visit software.intel.com/oneapi for more details
Some capabilities may differ per architecture and custom-tuning will still be required. Other accelerators to be supported in the future.

Intel oneAPI Software Tools for AI & Analytics

Intel® oneAPI Toolkits

Intel® oneAPI AI Analytics Toolkit

Accelerate machine learning & data science pipelines with optimized deep learning frameworks & high-performing Python libraries

Data Scientists, AI Researchers, DL/ML Developers

Intel® oneAPI Base Toolkit

Incl. Intel® oneAPI Deep Neural Network Library (oneDNN), Intel® oneAPI Collective Communications Library (oneCCL), & Intel® oneAPI Data Analytics Library (oneDAL)

Optimize primitives for algorithms and framework development

DL Framework Developers - Optimize algorithms for Machine Learning & Analytics

Toolkit Powered by oneAPI

Intel® Distribution of OpenVINO™ Toolkit

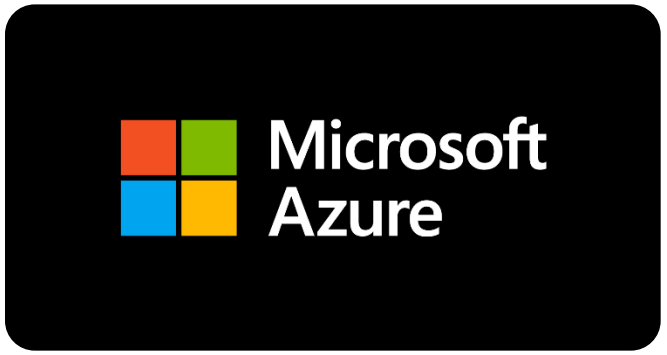
Deploy high performance inference & applications from edge to cloud

AI Application, Media, & Vision Developers

OpenVINO™

oneAPI Ecosystem Endorsements for AI domain

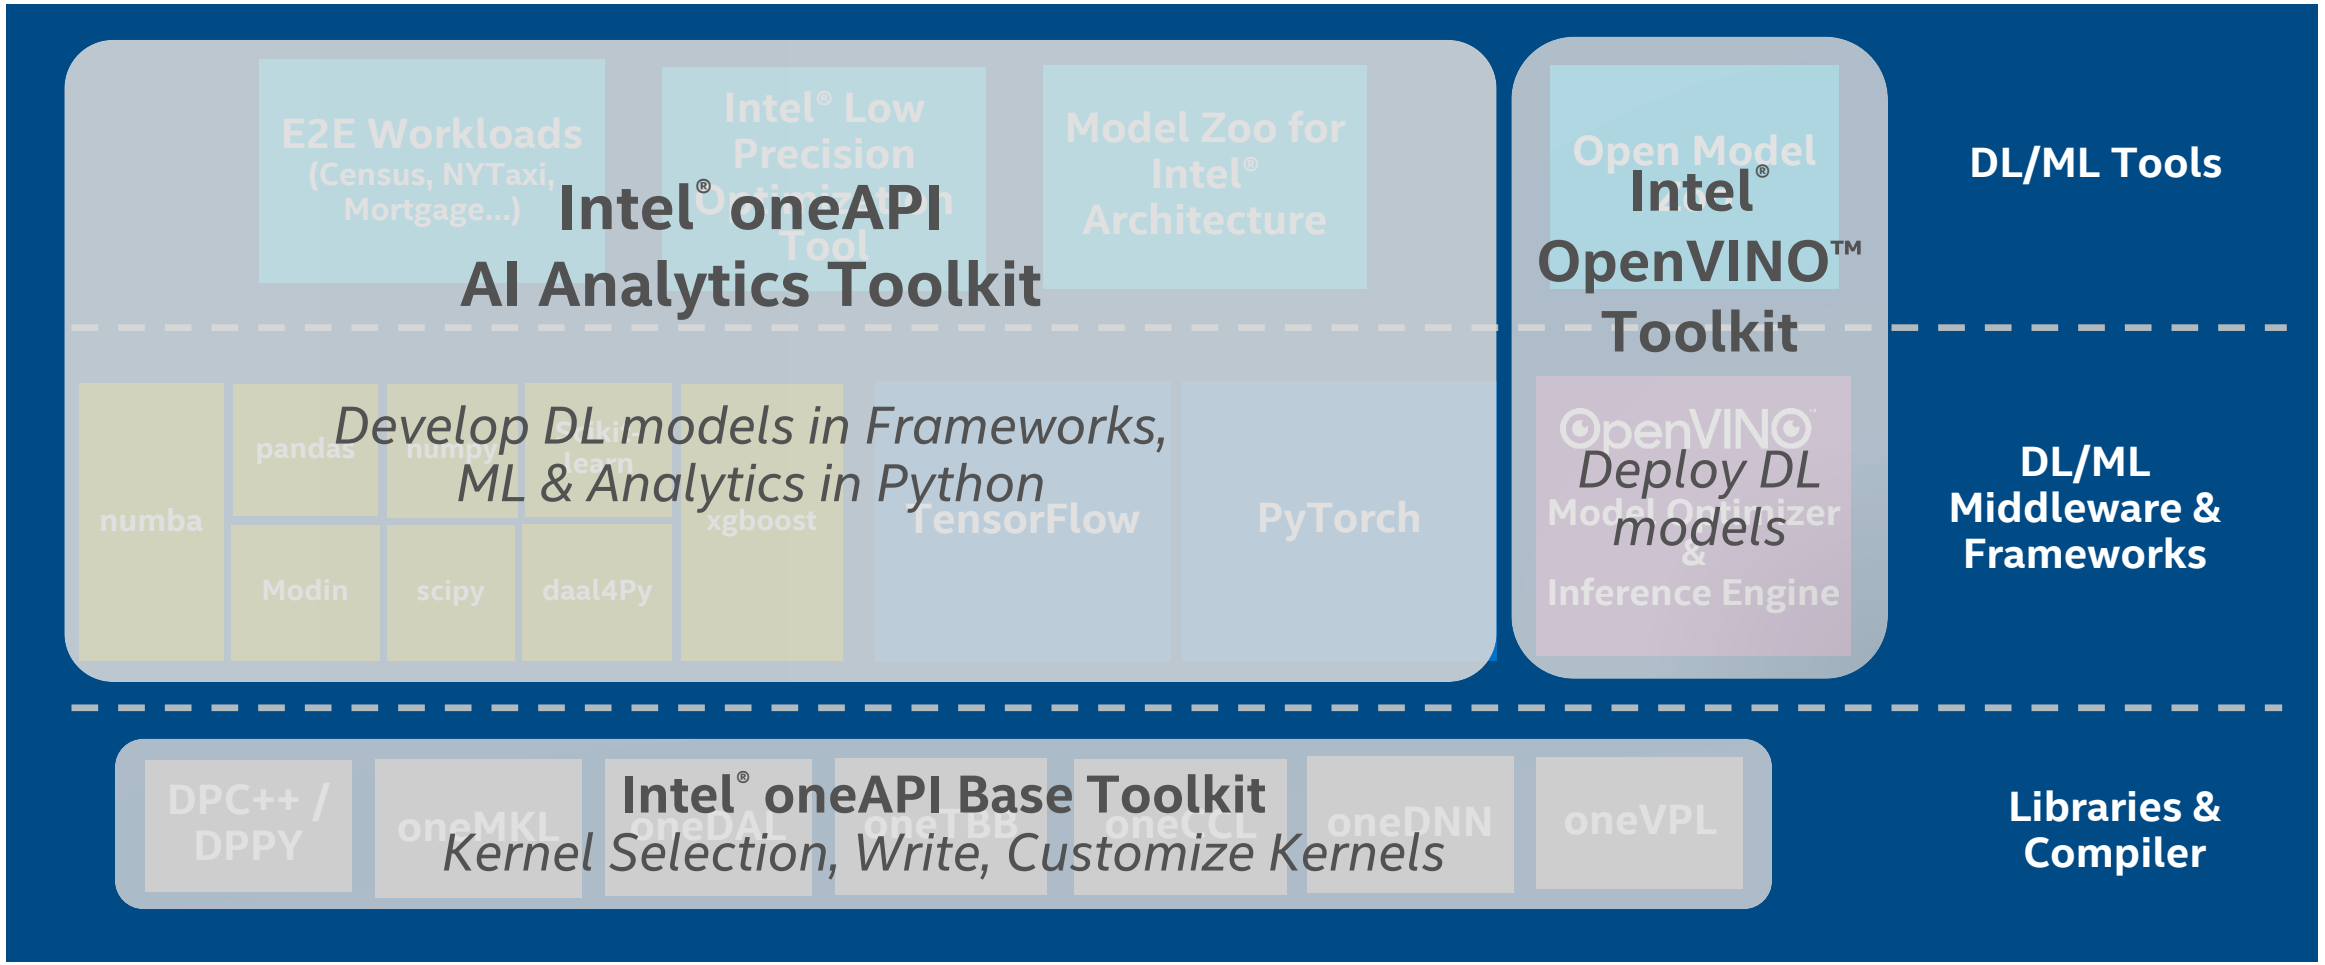
The industry needs a programming model where developers can take advantage of an array of innovative hardware architectures. The goal of oneAPI is to provide increased choice of hardware vendors, processor architectures, and faster support of next-generation accelerators. Microsoft has been using oneAPI elements across Intel hardware offerings as part of its initiatives and supports the open standards-based specification. We are excited to support our customers with choice and accelerate the growth of AI and machine learning.
- Tim Harris, Principal Architect, Azure AI, Microsoft



With the growth of AI, machine learning, and data-centric applications, the industry needs a programming model that allows developers to take advantage of rapid innovation in processor architectures. TensorFlow supports the oneAPI industry initiative and its standards-based open specification. oneAPI complements TensorFlow's modular design and provides increased choice of hardware vendor and processor architecture, and faster support of next-generation accelerators. TensorFlow uses oneAPI today on Xeon processors and we look forward to using oneAPI to run on future Intel architectures.

AI Software Stack for Intel XPUs

Intel offers a Robust Software Stack to Maximize Performance of Diverse Workloads



Full Set of Intel oneAPI cross-architecture AI ML & DL Software Solutions

Intel® AI Analytics Toolkit

Powered by oneAPI

Accelerate end-to-end AI and data analytics pipelines with libraries optimized for Intel® architectures

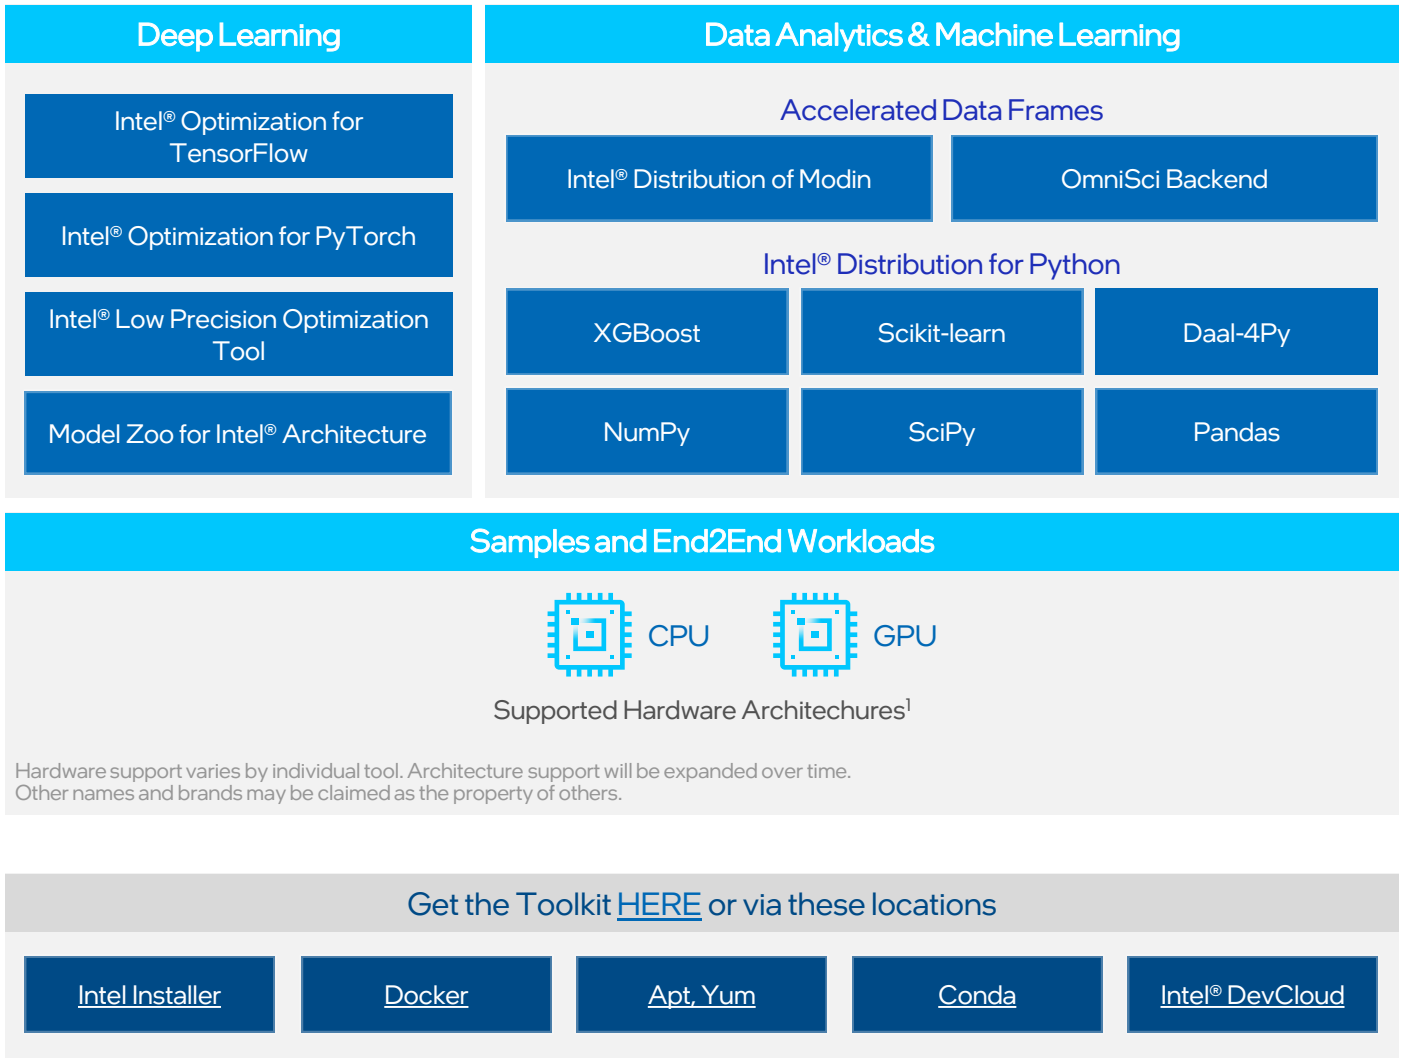
Who Uses It?

Data scientists, AI researchers, ML and DL developers, AI application developers

Top Features/Benefits

- Deep learning performance for training and inference with Intel optimized DL frameworks and tools
- Drop-in acceleration for data analytics and machine learning workflows with compute-intensive Python packages

Learn More: software.intel.com/oneapi/ai-kit



Key Features & Benefits - a little teaser

Intel® oneAPI AI Analytics Toolkit

- Accelerate end-to-end AI and Data Science pipelines, achieve drop-in acceleration with optimized Python tools built using oneAPI libraries (i.e. oneMKL, oneDNN, oneCCL, oneDAL, and more)
- Achieve high-performance deep learning training and inference with Intel-optimized TensorFlow and PyTorch versions, and low-precision optimization with support for fp16, int8 and bfloat16
- Expedite development using open source Intel-optimized pre-trained deep learning models for best performance via Model Zoo for Intel® Architecture (IA)
- Supports cross-architecture development (Intel® CPUs/GPUs) and compute

Getting Started with Intel® oneAPI AI Analytics Toolkit

Overview

- Visit Intel® oneAPI AI Analytics Toolkit (AI Kit) for more details and up-to-date product information
- Release Notes

Installation

- Download the AI Kit from Intel, Anaconda or any of your favorite package managers
- Get started quickly with the AI Kit Docker Container
- Installation Guide
- Utilize the Getting Started Guide

Hands on

- Code Samples
- Build, test and remotely run workloads on the Intel® DevCloud for free. No software downloads. No configuration steps. No installations.

Learning

- Machine Learning & Analytics Blogs
- Intel AI Blog site
- Webinars & articles

Support

- Ask questions and share information with others through the Community Forum
- Discuss with experts at AI Frameworks Forum

Download Now

oneAPI Available on

Intel® DevCloud for oneAPI

A development sandbox to develop, test and run workloads across a range of Intel CPUs, GPUs, and FPGAs using Intel's oneAPI software.

Get Up & Running In Seconds!

Sign up at:
software.intel.com/devcloud/oneapi

intel DevCloud

1 Minute to Code

No Hardware Acquisition

No Download, Install or Configuration

Easy Access to Samples & Tutorials

Support for Jupyter Notebooks, Visual Studio Code

High-Performance Deep Learning Using Intel® Distribution of OpenVINO™ toolkit - **Powered by oneAPI**

A toolkit for fast, more accurate real-world results using high-performance AI and computer vision inference deployed into production on Intel XPU architectures (CPU, GPU, FPGA, VPU) from edge to cloud

Who needs this product?

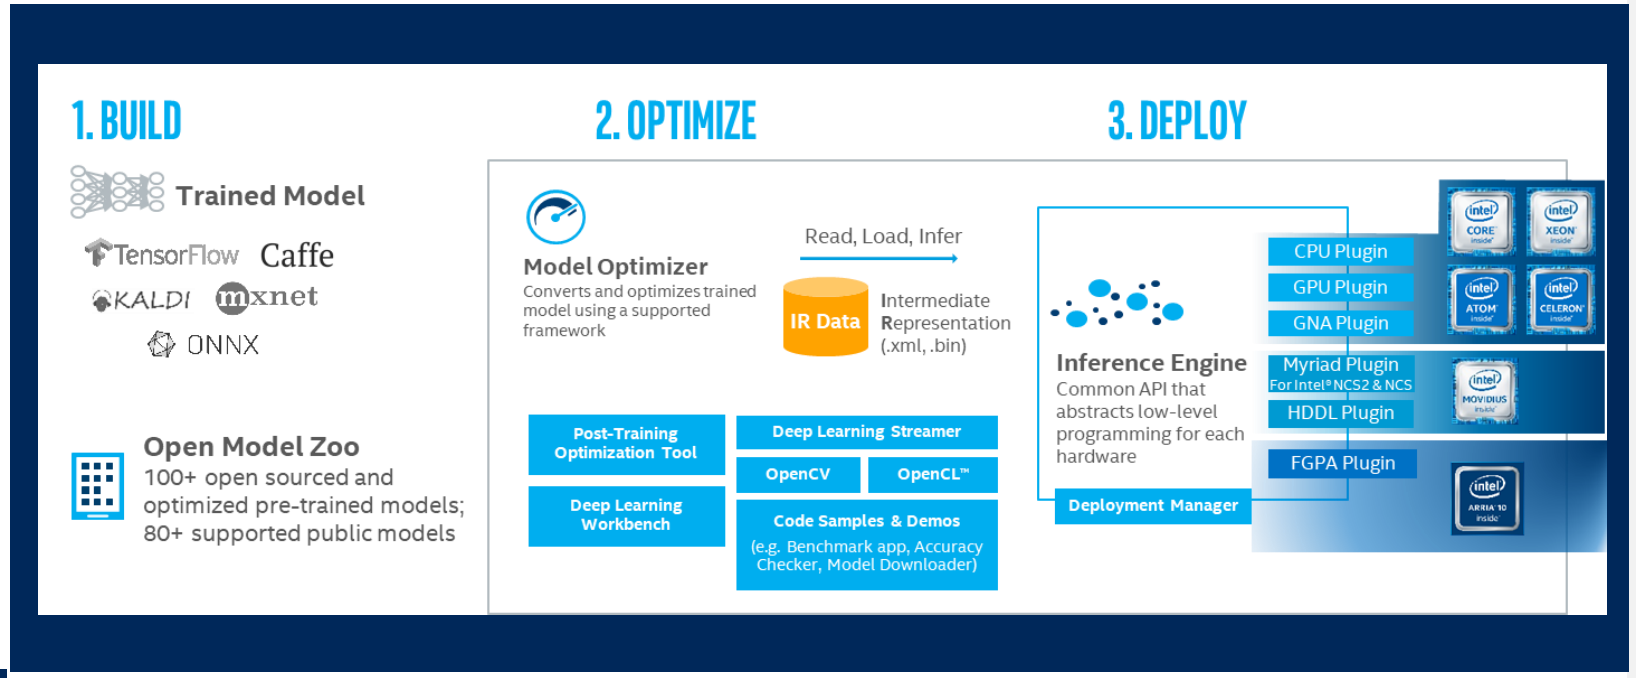
AI application developers, OEMs, ISVs, System Integrators, Vision and Media developers

Top Features/Benefits

High-performance, deep learning inference deployment

Streamlined development; ease of use

Write once, deploy anywhere



Proven, industry-leading accelerated technology

software.intel.com/openvino-toolkit

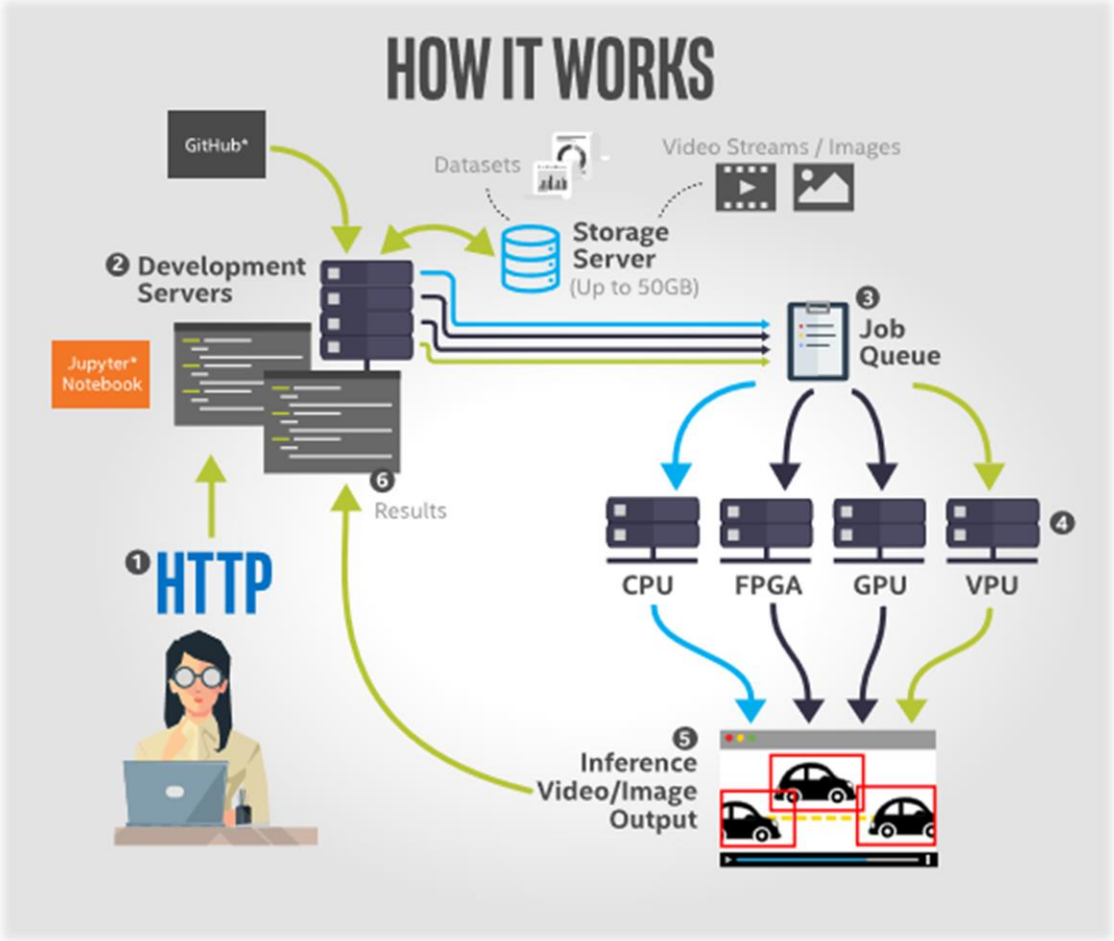
Getting Started with Intel® Distribution of OpenVINO™ Toolkit

Overview	Installation	Hands on	Learning	Support
▪ Visit Intel® Distribution of OpenVINO Toolkit for more details and up-to-date product information ▪ Release Notes	▪ Download the Intel® Distrubution of OpenVINO™ toolkit, or get via YUM or APT repositories ▪ Utilize the Getting Started Guide	▪ Understand sample demos and tools included ▪ Build, test and remotely run workloads on the Intel® DevCloud for the Edge before buying hardware	▪ Intel AI Blog site ▪ Webinars & articles ▪ Choose hardware option with Performance Benchmarks	▪ Ask questions and share information with others through the Community Forum

Download Now

Accelerate Time to Production with Intel® DevCloud for the Edge

See immediate AI Model performance across Intel's vast array of Edge Solutions

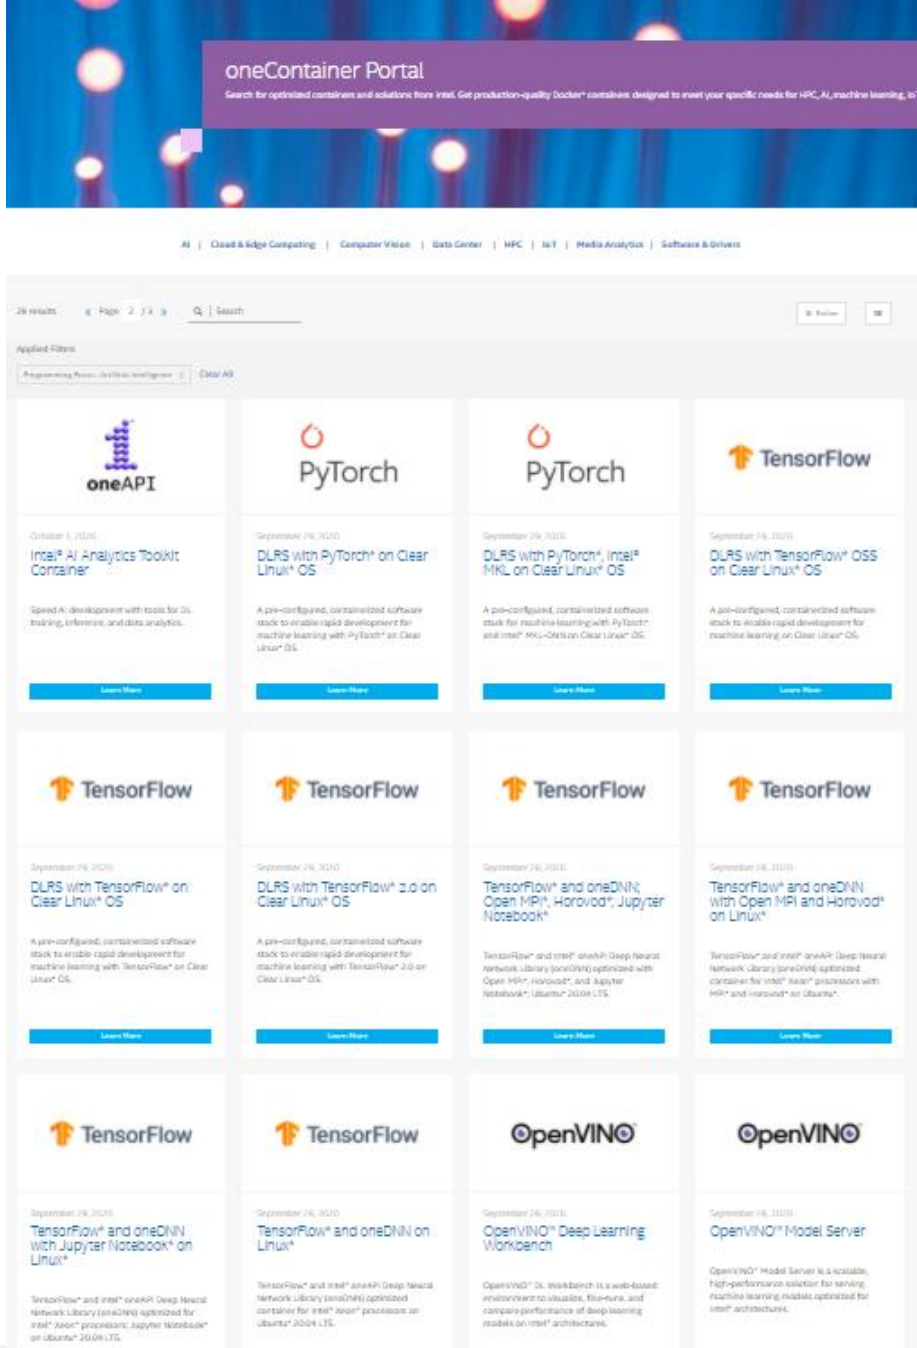


- **Instant, Global Access**
  Run AI applications from anywhere in the world
- **Prototype on the Latest Hardware and Software**
  Develop knowing you're using the latest Intel technology
- **Benchmark your Customized AI Application**
  Immediate feedback - frames per second, performance
- **Reduce Development Time and Cost**
  Quickly find the right compute for your edge solution

Sign up now for access

AI Containers for Flexibility

- Optimized, validated, deployable AI containers
- Available via Docker containers. Will expand to include Kubernetes orchestrations, Helm charts
- Access from oneContainer Portal
  - Include containers with ready-to-use AI software stacks
  - And containers with full AI workloads (including models)



Topology	Frameworks
DLRM	PYT

Yolo-V3	PYT, TF, OV
NCF*	TF

Which Toolkit Should I Use

Use Both!

Intel® oneAPI Analytics Toolkit & Intel® Distribution of OpenVINO™ toolkit

Toolkits are complementary to each other and recommendation is to use them both based on your current phase of AI Journey

- *I am **exploring and analyzing data;** I am **developing models***
- *I want **performance and compatibility** with frameworks and libraries I use*
- *I would like to have **drop-in acceleration** with little to no additional code changes*
- *I prefer **not to learn any new tools** or languages*

Data Scientist/ML Developer
Intel® oneAPI AI Analytics Toolkit

- *I am **deploying models***
- *I want **leading performance and efficiency** across multiple target HW*
- *I'm concerned about **having lower memory footprint**, which is critical for deployment*
- *I am **comfortable with learning and adopting a new tool or API** to do so*

App Developer
Intel® Distribution of OpenVINO™ toolkit

If you prefer working on primitives and to optimize kernels and algorithms directly using oneAPI libraries (oneDNN, oneCCL & oneDAL), then use Intel® oneAPI Base Toolkit

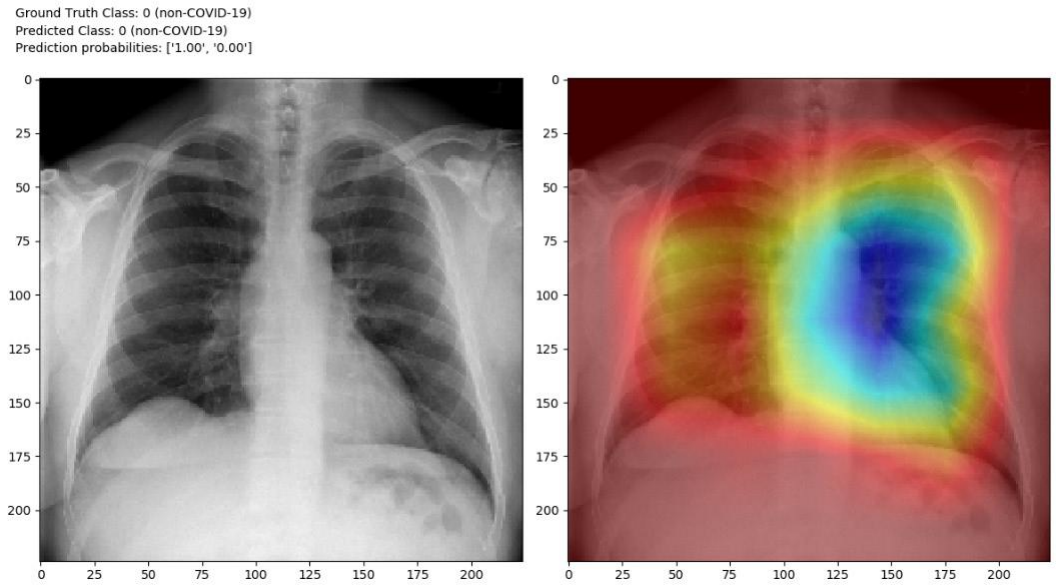
Customer Success Story

Accrad AI-based Solution Helps Accelerate COVID-19 Diagnosis

Optimized by Intel® oneAPI Analytics Toolkit & Intel® Distribution of OpenVINO™ toolkit

CheXRad helps radiologists and physicians identify COVID-19, viral pneumonia and other diseases on chest X-ray images, and predict the need for ventilators.

- *CheXRad* comes pre-configured with a COVID-19 and viral pneumonia classification neural network.
- To architect, train and validate the neural network, Accrad used **Intel Tensorflow from AI Analytics Toolkit** and the **Intel oneAPI DevCloud** to develop the model.
- To optimize its model for deployment, Accrad used **OpenVINO™ toolkit** and **Intel® DevCloud for Edge**.
- *CheXRad* could classify pathologies in 140 chest x-rays in just **90 seconds** —up to **160x faster** than radiologists, at comparable levels of accuracy, sensitivity and specificity.



Learn more in this solution brief

Key Takeaways & Call to Action

- Intel toolkits are **FREE**, complementary & work seamlessly together
- They help achieve performance & efficiency across different stages of AI Journey
- Recommend the toolkits based on current phase of customer pipeline

intel

Which Toolkit to Use When ?

	Intel® oneAPI AI Analytics Toolkit	Intel® Distribution of OpenVINO™ toolkit
Key Value/ Benefits	▪ Provides performance and easy integration across end-to-end data science pipeline for efficient AI model development ▪ Maximum compatibility with open source FWKs and Libs with drop-in acceleration that requires minimal to no code changes	▪ Provides high performance and efficiency for DL inference solutions to deploy across Intel XPU architectures (cloud to edge) ▪ Optimized package size for deployment based on memory requirements
Users	Data Scientists, AI Researchers, DL/ML Developers	AI Application Developers, Media and Vision Developers
Use Cases	▪ Data Ingestion, data pre-processing, ETL operations ▪ Model training and inference ▪ Scaling to multi-core / multi-nodes / clusters	▪ Inference applications for vision, speech, text, NLP ▪ Media streaming / encode, decode ▪ Scale across hardware architectures – edge, cloud, datacenter, device
Hardware Support	▪ CPUs – Data center, server, workstation segments – Intel® Xeon® and Core™ processors ▪ Future Intel Xᵉ GPUs – Artic Sound/Ponte Vecchio	▪ CPU – Intel Xeon, Core and Atom processors ▪ GPU – Intel® Processor Graphics (integrated), Intel® Iris® Xᵉ Max Graphics, Future Intel Xᵉ architecture Artic Sound/Ponte Vecchio ▪ VPU - NCS & Intel® Vision Accelerator Design Products ▪ FPGA - Intel® Arria® 10 FPGA ▪ GNA - Intel® Gaussian & Neural Accelerator
Low Precision Support	**Use Intel® Low Precision Optimization Tool when using the Intel oneAPI AI Analytics Toolkit** ▪ Supports BF16 for training and FP16, Int8 and BF16 for Inference ▪ Seamlessly integrates with Intel optimized frameworks ▪ Available in the AI toolkit and independently	**Use Post Training Optimization Tool when using OpenVINO** ▪ Supports FP16, Int8 and BF16 for inference ▪ Directly works with Intermediate Representation Format ▪ Available in the Intel Distribution of OpenVINO toolkit ▪ Provides Training extension via NNCF for PyTorch with FP16, Int8

Exception: If a model is not supported by OpenVINO™ toolkit for inference deployment, build custom layers; or fall back to use the Intel oneAPI AI Analytics Toolkit and use optimized DL frameworks for inference.

BackUp

Intel® oneAPI Base Toolkit

Accelerate Data-centric Workloads

A set of core tools and libraries for developing high-performance applications on Intel® CPUs, GPUs, and FPGAs

Who Uses It?

- A broad range of developers across industries
- Native Code Developers/Framework Developers

Top Features/Benefits

- Data Parallel C++ (DPC++) compiler, library and analysis tools; DPC++ Compatibility tool helps migrate existing code written in CUDA
- Optimized performance libraries for threading, math, data analytics, deep learning, and video/image/signal processing

Notices & Disclaimers

Performance varies by use, configuration and other factors. Learn more at www.Intel.com/PerformanceIndex.

Performance results are based on testing as of dates shown in configurations and may not reflect all publicly available updates. See backup for configuration details. No product or component can be absolutely secure.

Your costs and results may vary.

Intel technologies may require enabled hardware, software or service activation.

Intel does not control or audit third-party data. You should consult other sources to evaluate accuracy.

Configurations

Deep Learning Training and Inference Performance using Intel® Optimization for PyTorch with 3rd Gen Intel® Xeon® Scalable Processors
ResNet50/ResNext101 (FP32/BF16): batch size 128/instance, 4 instances.
ResNet50/ResNext101 dataset (FP32/BF16): ImageNet Dataset
DLRM batch size (FP32/BF16): 2K/instance, 1 instance
DLRM dataset (FP32/BF16): Criteo Terabyte Dataset
DLRM batch size (INT8): 16/instance, 28 instances, dummy data.
Tested by Intel as of 6/2/2020.
Intel® Xeon® Platinum 8380H Processor, 4 socket, 28 cores HT On Turbo ON Total Memory 768 GB (24 slots/ 32GB/ 3200 MHz), BIOS: WLYDCRB1.SYS.0015.P96.2005070242 (ucode: 0x700001b), Ubuntu 20.04 LTS, kernel 5.4.0-29-generic

Inference Throughput FP32 vs Int8 optimized by Intel® Optimization for Tensorflow and Intel® Low Precision Optimization Tool (part of the Intel® oneAPI AI Analytics Toolkit)
Tested by Intel as of : 10/26/2020: TensorFlow v2.2 (https://github.com/Intel-tensorflow/tensorflow/tree/v2.2.0); Compiler: GCC 7.2.1; DNNL(https://github.com/oneapi-src/oneDNN) v1.2.0 75d0b1a7f3586c212e37acebbb8acd221cee7216; Dataset: ImageNet/Coco/Dummy, refer to each model README; Precision: FP32 and Int8
Platform: Intel® Xeon® Platinum 8280 CPU; #Nodes: 1; #Sockets: 2; Cores/socket: 28; Threads/socket: 56; HT: On; Turbo: On; BIOS version: SE5C620.86B.02.01.0010.010620200716; System DDR Mem Config: 12 slots / 16GB / 2933; OS: CentOS Linux 7.8; Kernel: 4.4.240-1.el7.elrepo.x86_64

Stock scikit-learn vs Intel-optimized scikit-learn
Testing by Intel as of 10/23/2020. Intel® oneAPI Data Analytics Library 2021.1 (oneDAL), scikit-learn 0.23.1, Intel® Distribution for Python 3.8; Intel® Xeon® Platinum 8280LCPU @ 2.70GHz, 2Sockets, 28 cores per socket, 10M samples, 10 features, 100 clusters, 100 iterations, float32

XGBoost CPU vs GPU
Test configs: Tested by Intel as of 10/13/2020;
CPU: c5.18xlarge AWS Instance (2 x Intel® Xeon Platinum 8124M @ 18 cores, OS: Ubuntu 20.04.2 LTS, 193 GB RAM. GPU: p3.2xlarge AWS Instance (GPU: NVIDIA Tesla V100 16GB, 8 vCPUs), OS: Ubuntu 18.04.2 LTS, 61 GB RAM. SW: XGBoost 1.1:build from sources. compiler – G++ 7.4, nvcc 9.1. Intel® Data Analytics Acceleration Library (Intel® DAAL): 2019.4 version; Python env: Python 3.6, Numpy 1.16.4, Pandas 0.25, Scikit-lean 0.21.2.

XGBoost fit CPU acceleration
Test configs: Tested by Intel as of 10/13/2020; c5.24xlarge AWS Instance, CLX 8275 @ 3.0GHz, 2 sockets, 24 cores per socket, HT:on, DRAM (12 slots / 32GB / 2933 MHz); SW: XGBoost 0.81, 0.9, 1.0 and 1.1:build from sources. compiler – G++ 7.4, nvcc 9.1. Intel® DAAL: 2019.4 version; Python env: Python 3.6, Numpy 1.16.4, Pandas 0.25, Scikit-lean 0.21.2.

End-to-End Census Workload Performance
Tested by Intel as of 10/15/2020. 2x Intel® Xeon® Platinum 8280 @ 28cores, OS: Ubuntu 19.10.5.3.0-64-generic Mitigated, 384GB RAM. SW: Modin 0.8.1, scikit-learn 0.22.2, Pandas 1.0.1, Python 3.8.5, Daal4Py 2020.2 Census Data, (21721922, 45). Dataset is from IPUMS USA, University of Minnesota, www.ipums.org . Version 10.0.

Tiger Lake + Intel® Distribution of OpenVINO™ toolkit vs Coffee Lake CPU

System Board	Intel prototype, TGL U DDR4 SODIMM RVP	ASUSTeK COMPUTER INC. / PRIME Z370-A
CPU	11th Gen Intel® Core™ -5-1145G7E @ 2.6 GHz.	8th Gen Intel® Core™ i5-8500T @ 3.0 GHz.
Sockets / Physical cores	1 / 4	1 / 6
